

## INSTITUTIONS DISTINCTIVENESS

Arakkonam a place surrounded with un developed, under privileged villages where the people were not have much exposure to education, wealth creation and poor labours did not get needed educational priorities and jobs to make livelihood during 80's and 90's, also it was the place have not attracted the best resources either politically or charity and the people have to run to Chennai and Vellore a distance faraway nearly 75kms and 65kms respectively. The most of the people dwell in huts in a crumbling way of life, though there were establishments like Railway workshops, Steel factory, Cement industry yet all are labours without guidance and progress in life. In the Backward area and in a bad scenario during these years the only way of getting good job and education was moving to Chennai and that too in a Hardship of gruesome travelling by stream engine and latter electrified motors by this time.

The years of 80's and 90's are not golden years on facing such hardships with haunting horrors of life suffered by the people our chairman Dr. T.R.Subramaniyan with lot of efforts in the year 1992 have established INDUSTRIAL TECHNICAL INSTITUTE at Arakkonam with available resources to make the people get a decent job at the level of technical craftsmanship in workshops and other private manufacturing industries on completing Xth standard. The first ray of hope and ripple the people a confident of living during 90's.

Again in the progressive years , there is a wave of interaction among the people of local and rural people coming together and encouraged to open a polytechnic at Arakkonam after studying tenth standard. The main issue among the people is the girl child, on completion of tenth standard could not go to Chennai or Vellore to technical institute to promote themselves during these years. In the year 1994, The chairman on due consultation with philanthropists, academicians and educationist guided to open a polytechnic at Arakkonam for the cause of rural welfare of the people. This will help all the nearby villages like pothaturpet, Ammaiarkuppam, ammanur, thirutani, salai, minnal, Sholingur etc. and with the motivation received the chairman established In 1995, Sri Krishna polytechnic college for our credits. Student, NIZAMUDHIN scored 1170 out of 1200 in the three year course and got governmental recognition and the same continued in future. Many a students studied and completed ITI and polytechnic courses for a better future.

Since it was felt the students should have been given proper education at the grassroots level establishing a primary school felt a must during the above years. Such a good academics skills at the primary stage of students can lift the students from the grass root level and another perspective initiated by opening Sri Krishna matriculation school. However ,In the progressive years along with the development of the place there was an undeniable development in the school structure and it was find inevitable for a CBSE school, thus TRS global public school ,TRS iken brainkids for the primary students started. Along with the development in infrastructure and academic skills they want of teachers going in a constructive and progressive development, the teachers vacancies opened a recruitment drive at the school and college levels , this has resulted for the drive of future teachers and the need felt in opening of training institutions like Sri Krishna college of education B.Ed. and M.Ed. at Arakkonam established in clear motive .

In the thirst of development and in sheer motivation as a one more golden stud, SRI KRISHNA COLLEGE OF ENGINEERING established during the year 2009-2010. Of course, the period of establishing engineering college at the crucial time when a lot of opening of new colleges and granting private universities nearby Vellore and at Chennai, consequently bifurcating Vellore in to two districts as Vellore and Ranipet done more breathless hardships in the competitive world of Engineering. Yet we have not lost the grit of development and serving the people in real spirit. This as given slow progress to the institution in the competitive area with the blessings of academicians, educationist and other well-wishers. We have taken the pride during the 2013 general counseling , a transgender GRACE BANU (Register No:112313105301) selected our institution that was the talk of the day in the media throughout . And we are elevated to new heights and developed us really to the cause of the society and want of the people. Meantime we humbly submit the period of Pandemic corona putas in a great hardship in admission, placement and relevant infrastructural damages in generating the employment become a question among the people resulted in loss of shine and the colleges located in the rural areas suffered a lot in admissions.

The unlikely employment generation by the professional courses resulted in opting of the students in other professional areas in CA , ICWA, ACS, Arts & Science colleges put a strong brake in the development of engineering colleges, The rural colleges are the most sufferer during the period. In the consequent years, the education department and all other resources suffered in a global pandemic CORONA for the two years 2019-20 and 2020-21 we are faced the hardships in many accounts, all the staffs need be given confident for the job safe guarded a life will be at the end of the tunnel rather than the beginner of the tunnel with bright prospective in the most suffering times. We have forced to take new beginning, a total shut down of the institution, and lost the machineries, system, electricity and transport system to the institution. And educational values among the children. Apartfrom these, our institution was earmarked for CORONA isolated place and our hostel converted to 100 bed hospital with the guidance of health department by the state government. Our staffs and student never visit the college during these days and online education was the mode of study was whether appreciated and non-appreciated become a clueless criteria during the online education.

Reopening of colleges after Pandemic years was a new beginning, new endeavor, new prospective and future development in slow and steady way we are forced to beginning the leap as in 2009 amidst the above situation. We have taken the good initiative for the development and cause again blood donation on 24th December every year as a welfare MEASURES, TRS SCHOLARSHIP INITIATED IN THE succeeding YEARS. As a measure of developing employability skills of the students coordinated hand in hand with the NAAN MUDHALVAN scheme, Mini Projects and Projects by the students gathered momentum for the best achievements. We are the host college for many a courses in the naan mudhalvan scheme. Our MOTTO -Talent, Technique and Training are thecauses for development of high human values.

We proudly say the quotes of Vivekananda “ **EDUCATION IS NOT THE AMOUNT OF INFORMATION THAT IS PUT IN TO THEIR BRAIN ,UNDIGESTED ALL YOUR LIFE WE MUST HAVE LIFE BUILDING MAN MAKING CHARACTER MAKING ASSIMILATION OF IDEAS IF YOU HAVE ASSIMILATED AND MADE THEM YOUR LIFE AND CHARACTER, YOU HAVE MORE EDUCATION THAN ANY MAN WHO HAS GOT BY HEART A WHOLE LIBRARY”.**
